1. PROJECT SUMMARY

#	Project	Status	Start Date
PRJ-001	Shopify → Bsale Web Sync	☐ In Progress	July 2026
PRJ-002	ML Inventory Dashboard	☐ Pending Deploy	August 2026
PRJ-003	Inventory Credit App	☐ Running	July 2026
PRJ-004	ML → Bsale Webhook Hub	☐ Running	July 2026
PRJ-005	Product Sync Bsale	☐ Running	July 2026
PRJ-006	Shopify Product Migrator	☐ Running	August 2026
PRJ-007	Shopy Enterprise Landing Page	☐ Deployed	August 2026
PRJ-009	Nebro Pricing App	☐ Running	August 2026

PRJ-010	nebro.shop → Moreka Shop Migration	☐ Completed	June-July 2026
---------	------------------------------------	-------------	----------------

2. DETAILED PROJECTS

PRJ-001: Shopify → Bsale Web Sync

Description: Automatic synchronization of product images and descriptions from Shopify (Moreka Shop) to Bsale Web, using SKU as the common identifier.

Flow:

Shopify (Moreka Shop) → "Product update" Webhook → Hub Server → Bsale API → Bsale Web Store

Features: - Search product by SKU in Bsale - If no web description exists → creates it automatically - If web description exists but is inactive → activates it - If active → updates images + description - Manual sync by SKU available

Endpoints: | Endpoint | Method | Description | |-----|-----|-----|
| /webhook/shopify-product | POST | Receives Shopify webhooks | |
| /webhook/sync/product | POST | Manual sync by SKU |

Technologies: Node.js, TypeScript, Express, Bsale API v1/v2, Shopify API

Status: ☐ Code implemented, pending DNS and webhook verification

PRJ-002: ML Inventory Dashboard

Description: Dashboard to monitor inventory on Mercado Libre, with tracking of published products, stock, and sales metrics.

Repository: morekaoficial-lgtm/marketplace-profit-tracker

Server: DigitalOcean (68.183.118.116:/opt/ml-inventory-dashboard)

Features: - Connection with Mercado Libre API - ML inventory visualization - Sales and stock metrics

Technologies: Node.js, TypeScript, Express, Mercado Libre API

Status: ☐ Pending deploy. User has APP_ID and CLIENT_SECRET. Need to connect SSH and complete OAuth.

PRJ-003: Inventory Credit App

Description: Web application to calculate and generate credit notes based on product cost changes. Compares historical cost vs. current cost and calculates the difference by units in stock.

Repository: morekaoficial-lgtm/inventory-credit-app

Server: DigitalOcean (68.183.118.116, port 3001)

Features: - Automatic credit note calculation by SKU - Stock report by branch - Export to Excel - Filter by INV- receptions - Web administration panel

Main Endpoints: | Endpoint | Description | |-----|-----| |
/api/sync/:sku | Syncs a product by SKU | | /api/report/:sku |
Generates individual report | | /api/credit-notes/excel | Exports credit
notes to Excel | | /api/sync/update-offices | Updates all branches |

Technologies: Node.js, TypeScript, Express, Bsale API, vanilla HTML

Status: ☐ Running in production

PRJ-004: ML → Bsale Webhook Hub

Description: Central webhook hub connecting Shopify, Bsale, and Mercado Libre. Processes sales orders, synchronizes inventory, and manages web orders.

Repository: morekaoficial-lgtm/Integracion

Server: DigitalOcean (68.183.118.116, port 3000)

Implemented Flows:

Flow	Direction	Status
Web Orders	Shopify → Bsale	☐ Running
Inventory Sync	Bsale → Shopify	☐ Running
Product Sync	Shopify → Bsale Web	☐ Implemented
ML Sync	Bsale → Mercado Libre	☐ Implemented

Endpoints: | Endpoint | Method | Description | |-----|-----|-----|
| /webhook/shopify | POST | Receives Shopify orders | | /webhook/bsale |
POST | Receives Bsale stock changes | | /webhook/ml | POST | Receives
ML notifications | | /admin | GET | Administration panel |

Technologies: Node.js, TypeScript, Express, Shopify API, Bsale API, Mercado Libre API

Status: ☐ Running in production (with PM2)

PRJ-005: Product Sync Bsale

Description: Independent server to synchronize products from Shopify to Bsale web descriptions. Includes administration panel and “merge variants” functionality.

Repository: morekaoficial-lgtm/product-sync-bsale

Server: DigitalOcean (68.183.118.116, port 3003)

Features: - Automatic sync via Shopify webhook - Manual sync by SKU - Variant merging (colors/sizes) into a single web description - Web administration panel

Endpoints: | Endpoint | Method | Description | |-----|-----|-----|
| /webhook | POST | Shopify webhook | | /sync/sku | POST | Manual sync
by SKU | | /sync/merge-variants | POST | Merge variants | | /health |
GET | Health check |

Technologies: Node.js, TypeScript, Express, Shopify GraphQL API, Bsale API

Status: ☐ Running in production

PRJ-006: Shopify Product Migrator

Description: Web tool to migrate products between Shopify stores. Allows searching products by SKU, handle, or title and migrating them with images, variants, and metadata.

Server: DigitalOcean (68.183.118.116, port 3005)

Features: - Product search by SKU, Handle, or Title - Complete metadata reading - Product creation in destination store - Metafields synchronization - Dry Run mode (simulation)

Technologies: Node.js, TypeScript, Express, Shopify GraphQL API

Status: ☐ Running in production. Pending: mass migration via CSV.

PRJ-007: Shopy Enterprise Landing Page

Description: Corporate website for Shopy Enterprise, with company information, brands, marketplaces, catalogs, and contact details.

Repository: [morekaofficial-lgtm/shopy-enterprise](https://github.com/morekaofficial-lgtm/shopy-enterprise)

URL: <https://morekaofficial-lgtm.github.io/shopy-enterprise/>

Features: - Transparent logo (RGBA PNG) - Brands section: Moreka, Nebro, G-Tide - Marketplaces: Mercado Libre, Amazon, Walmart, TikTok Shop, AliExpress, Sears, Sanborns - Downloadable catalogs - Contact information and business hours - Animations and modern design

Technologies: HTML5, CSS3, vanilla JavaScript, GitHub Pages

Status: ☐ Deployed and running

PRJ-009: Nebro Pricing App

Description: Price calculation application for Nebro products with multiple discount systems and profitability analysis.

Features: - Tab 1: Shopify products with price vs. cost comparison - Tab 2: Calculator by new system (Wholesale C, B, Z) - Tab 3: Volume calculator — Old System (Wholesale A) - Loss detection (highlighted in red)

Technologies: Python, Streamlit

Status: ☐ Running

PRJ-010: nebro.shop → Moreka Shop Migration

Description: Mass migration of products from nebro-shop store to Moreka Shop, including images, descriptions, variants, and metadata.

Results: - **Total products migrated:** ~32+ products - **nebro.shop catalog:** 125 products - **Moreka Shop catalog (post-migration):** ~1,113+ products

Method: Automated script with Shopify REST API

Technologies: Python, Shopify REST API

Status: ☐ Completed

3. PLATFORMS AND TECHNOLOGIES

3.1 E-commerce Platforms

Shopify

- **Stores:** Moreka Shop (morekashop1.myshopify.com), Nebro Shop (nebro-shop.myshopify.com)
- **Use:** Main online sales platform
- **Functions:** Product catalog, inventory, orders, webhooks
- **APIs:** REST API, GraphQL API, Webhooks

Bsale

- **Use:** Inventory management, sales, and billing system
- **Functions:** Stock control, purchase receptions, web orders, products
- **APIs:** API v1 and v2 (REST)
- **Key Endpoints:**
 - /v1/products.json — Products
 - /v1/products/{id}/variants.json — Variants
 - /v1/variant/{id}/stock.json — Stock
 - /v2/products/market_info.json — Web descriptions
 - /v1/documents.json — Sales documents
 - /markets/checkout.json — Web orders

Mercado Libre

- **Use:** Marketplace for sales
 - **Functions:** Listings, inventory, sales
 - **API:** Mercado Libre API (OAuth 2.0)
 - **Status:** Integration via webhook hub
-

3.2 Infrastructure

DigitalOcean

- **Server:** Droplet 68.183.118.116
- **System:** Ubuntu + Nginx + PM2
- **Hosted Services:**
 - Webhook Hub (port 3000)
 - Inventory Credit App (port 3001)
 - Product Sync Bsale (port 3003)
 - Shopify Migrator (port 3005)
 - ML Inventory Dashboard (port 8080, pending)

GitHub / GitHub Pages

- **Repositories:**
 - morekaoficial-lgtm/Integracion — Webhook Hub
 - morekaoficial-lgtm/inventory-credit-app — Credit notes
 - morekaoficial-lgtm/product-sync-bsale — Product sync
 - morekaoficial-lgtm/shopy-enterprise — Landing page
 - morekaoficial-lgtm/marketplace-profit-tracker — ML Dashboard
 - **GitHub Pages:** Hosting for Shopy Enterprise Landing Page
-

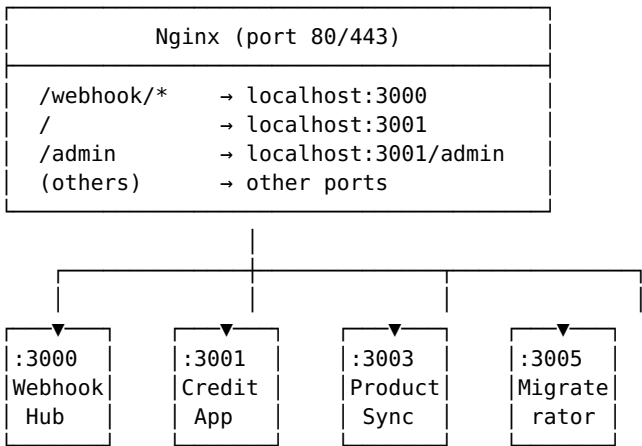

3.3 Technology Stack

Technology	Use
Node.js	Main backend (webhook hub, APIs)
TypeScript	Primary language for services
Express.js	Web framework

Python	Migration scripts, Streamlit apps
Streamlit	Data apps (pricing, calculators)
React	Frontend (web applications)
Nginx	Reverse proxy
PM2	Node.js process management
GitHub Actions	CI/CD (implicit)

4. SERVER ARCHITECTURE

DigitalOcean — 68.183.118.116

PM2 Processes

Name	Port	Status	Description
webhook	3000	☑ online	Main hub (sales + inventory + products)
inventory-credit	3001	☑ online	Credit note app
product-sync-bsale	3003	☑ online	Shopify → Bsale product sync
shopify-migrator	3005	☑ online	Shopify product migrator
ml-inventory-dashboard	8080	☐ pending	ML Dashboard (pending deploy)

5. OVERALL STATUS

Running ☑

- Bsale ↔ Shopify synchronization (inventory)
- Web Orders Shopify → Bsale
- Inventory Credit App (credit notes)
- Product Sync Bsale (web descriptions)
- Shopy Enterprise Landing Page
- Shopify Product Migrator
- Nebro Pricing App

Pending ☐

- ML Inventory Dashboard (needs deploy + ML OAuth)
- Shopify → Bsale Web Sync (verify DNS and webhooks)
- Configure custom domain shopyenterprise.com

Pending Validation

- Verify that Shopify “Product update” webhook is configured
- Confirm DNS for webhook.shopyenterprise.com
- Complete Mercado Libre OAuth for dashboard
